

Apthorp.

Isaiah Thomas's
MASSACHUSETTS, CONNECTICUT, RHODE-
ISLAND, NEWHAMPSHIRE & VERMONT
ALMANACK,
With an EPHEMERIS, for the Year of our LORD

1 7 9 9 ♦

Being the THIRD after BISSEXTILE, or LEAP YEAR,
and Twenty Third of the INDEPENDENCE of UNIT-
ED COLUMBIA.

From Creation, according to the Scriptures, 5761.

Adjusted to the Latitude and Longitude of the Town of BOSTON, but will serve
without essential Variation for the adjacent States.

Containing, besides the MORE than usual Astronomical
Calculations, a larger Quantity and greater Variety,
than are to be found in any other Almanack,

Of Matters Curious, Useful and Entertaining.

GREAT are thy works, ETERNAL POWER!
We look, we reverence, we adore.
Sun, Moon and Stars thy glorious will
Haste, in their courses, to fulfil.

Printed at WORCESTER, MASSACHUSETTS,
BY ISAIAH THOMAS.

Sold by him, and by I. Thomas, jun. in Worcester; by Thomas & Andrews,
S. Hall, D. West, E. Larkin, J. Boyle, W. Spotswood, and at the Boston
Bookstore, in Boston; by Thomas and Thomas, Walpole; by T. C. Cushing,
and J. Dabney, Salem; by Thomas, Andrews and Pennington, Albany; and
by all the bookfellers, in Town and Country.

Price 7½ Dols. per Gros - 75 Cents Doz - 10 Cents Single.

ECLIPSES in the year 1799.

THERE will be but two eclipses; both of which will be of the sun, and both invisible.

I. The first will be on the 4th day of May, 7h. 30 $\frac{1}{2}$ m. in the afternoon. The moon's latitude 7' S.

II. The second will happen on the 28th day of October, oh. 51 $\frac{1}{4}$ m. in the afternoon. The moon's latitude 7 $\frac{1}{4}$ ' N.

 Besides the eclipses, there will be a transit of Mercury over the sun's disc on the morning of the 7th day of May; but the beginning, as it will happen before sun rise, will be invisible, though the egress may be seen: as the planet will be more than seven hours in passing over the disc of the sun. The path of Mercury will be southwesterly.

FROM commencement, four and a half weeks. From the first Monday in January, six and a half weeks. From the Monday preceding the last Wednesday in May, two weeks.

THE MEDICAL LECTURES of the University at Cambridge, commence on the first Wednesday of October annually.

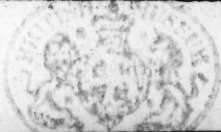

Mr. THOMAS,

Sturbridge, 1798.

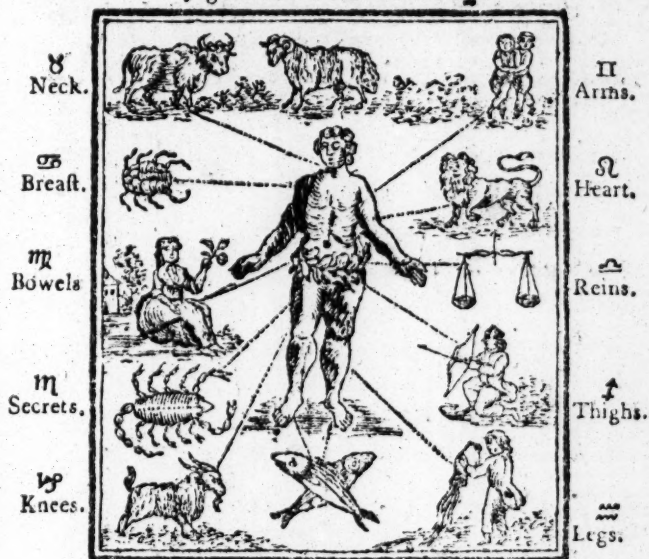

As a Solution of the Paradoxical Wedding in your last year's Almanac was requested, I send you the following, for your disposal, and am Sir, your humble servant,

SALLY BURNHAM.

TWO elderly men, and they were Brothers,
Married their nieces, who thus became Mothers;
Those marriages made two Sons and two Aunts;
Two Uncles, two Fathers, who were at the dance;
Now to grace the list two Daughters appear,
Two Husbands also, and two Wives very dear;
The third brother wedded his first brother's grand daughter,
Which made one a Grandson, the other a Grandfather,
This youngest couple did make a third pair,
And only six persons jigged it there.

**The ANATOMY of MAN's BODY, as governed by the Twelve
CONSTELLATIONS, according to ancient Astronomy, viz.**
♈ governs the Head and Face.

♊ The Feet.

Aries ♈ a Ram. *Taurus* ♉ a Bull. *Gemini* ♊ Twins. *Cancer* ♋ a Crab Fish. *Leo* ♌ a Lion. *Virgo* ♍ a Virgin. *Libra* ♎ Balance, or Scales. *Scorpio* ♏ a Scorpion. *Sagittarius* ♐ an Archer. *Capricornus* ♑ a Goat. *Aquarius* ♒ a Young Man pouring water out of a pot, *Pisces* ♓ Fish.

PROBATE COURTS in the COUNTY of WORCESTER.

AT the Probate Office in Worcester, on the first Tuesday in every month.—On the Thursday next after the third Tuesday in May, and the third Tuesday in October, at the house of Mr. *Josua Wright*, innholder in Templeton.—The fourth Tuesday in April and October, at the house of Capt. *Tilly Rice*, innholder in the west parish of Brookfield.—The third Tuesday in May and November, at the house of Mr. *Nathaniel Arnold*, innholder in Lancaffer. — Bennington, - - - 3d do.
 C. P. Providence, - - - 3d do.

JANUARY begins on Tuesday, hath xxxi Days.

BUT little can be done this month in the fields and gardens; but remember that at the close of it, the snow may chance to melt away, therefore improve sledging to get your supply of wood for the summer. Visit your corn bars and granaries; see that rats, mice, &c. do not destroy your grain, &c. Cut timber, if you wish it to last long, in the last quarter of the moon in this month. It is well to cut wood for burning in the first quarter of the moon. Look well to your chimnies, and keep them clean; when it rains, or your houses are covered with snow, look to your chimnies, and burn them clean; otherwise sweep them well in dry weather, which is much the best.

FEBRUARY begins on *Friday*, hath xxviii Days,

THIS month be sure to prune your fruit and other trees. If the snow is off the ground, and there should be a spell of moderate weather, the ground, which you prepared for peas in October you may now sow. Now get your tools in order for spring work while you have leisure. Remember it is a short month, and your time must be improved accordingly. As this is the last winter month, at the end of it, what is properly your winter work, should be completed. Look over your seeds of various kinds, and see that none of them are suffering through want of care. Celleri, Spinage, Asparagus, Parley, &c. may be sown in hot beds. This is also a good month for cutting timber; if you neglected it last month, be sure and do it this. When you have done with sleds, sleighs, &c. this season, put them carefully by, with their sackings, for another.

THE D. (Moon) is Apogee, when she is farthest from the Earth ; and Perigee, when nearest thereto.

MARCH begins on Friday, hath xxxi Days.

As soon as the snow is off the ground, repair your stone walls, and mend your other fences. Such work is generally neglected too long to the great detriment of the farmer. If you neglected your nurseries of fruit trees last month, be sure to visit them early this. The seasons are so uncertain in this country, as to their approach, that it is needless to say when the particular week should be to begin particular farming business. It is best to watch the weather, and be prepared to begin your work when it will permit. Should the season be favorable at the end of this month, you may graft and inoculate trees; and set them out for an orchard; but it commonly does as well, if you neglected setting out trees in the fall, to omit it until the beginning of April.

APRIL begins on Monday, hath xxx Days.

NOW begin in good earnest to engage in your spring work. Be it your first care to get your seed for spring grain into the ground. Sow flax seed as early as possible. If the season permits, get all your dung on the ground and your first ploughing completed; plant potatoes for early use about the middle of the month. You may now graft and inoculate fruit trees, and set out orchards. Be sure to be busy in your garden. Look to your shrubbery, and roots of all kinds. Turn the ground well up that it may be light and fit for the reception of seeds of various kinds. Sow Lettuce, &c. uncover your asparagus beds, if neglected last month, and with a small hoe, or dung fork, loosen the earth round the roots, transplant them, &c.

MAY begins on *Wednesday*, hath xxxi Days.

THIS is a very busy month for Farmers and Gardeners. Plant corn, potatoes, beans, &c. Continue to sow peas: Lettuce and sallading may now be planted for summer use. Plant rosemary, lavender, thyme, &c. Seeds of all kinds may now be put in the ground. Observe the best dung for gardens is untried earth, that is, rich and mellow ground, taken about half a foot below the surface of rich, ew earth: This is the most beneficial manure to all plants. If you use horse or cow's dung for your gardens, be sure to take that which is most rotted. New grafted trees ought constantly to be looked after. Hoe your first crop of turnips and sow a second.

JUNE begins on Saturday, hath xxx Days.

W EED your Indian corn; carrots should be weeded before the weeds overrun them, and thinned by hoeing. Hoe beds of beans, carrots, leeks, onions, parsnips, &c. Melons and cucumbers, attacked by black flies or spiders, must be fumigated, with tobacco smoke. Continue to plant beans. Be careful to destroy all kinds of weeds before they run to seed. Plant cucumbers at the latter end of this month for pickling. Water often in dry weather. Beds of seedlings. Continue to sow radish seeds, peas, &c. Cabbages should be often hoed and earthed, nothing will make them flourish better; seek and destroy worms. Slips, or cuttings of sage, rosemary, rue, lavender, southernwood, hyssop, thyme, &c. will now take tolerably well.

JULY begins on *Monday*, hath **xxxi** Days.

YOU may now sow peas for the fall; also turnips. Mill your Indian corn. Now for Hay. Attend to your grass; begin by mowing that which is ripest and thinnest. Look after your bees, which in hot weather will swarm. Turn bulls to store heifers. Get your pickles in order for reaping early rye, which will be fit for cutting the latter end of the month. Lay up such herbs for drying as are now in blow. Destroy weeds in all parts of the garden, and look well to, and water all plants which have been transplanted. Gather seeds of all sorts as they ripen. Hoe turnips sown last month.

AUGUST begins on Thursday, hath xxxi Days.

REAP and mow all kinds of corn as it becomes ripe. Pull and sack seed fax, if ripe. Continue to gather seeds of various sorts as they ripen, when the weather is dry. Gather herbs for distilling and drying. Hoe turnips, water feeding beds in the morning, if needed. Budding or inoculating generally succeeds best when it is performed in cloudy weather, or late in the afternoon. Such trees as were grafted in the spring and winter, may now be banded with any of the same sorts of fruit. If any of your fruit trees are blighted apply some hogs' dung immediately, digging it in with a fork.

SEPTEMBER begins on Sunday; hath xxx Days.

LOOK to your Indian corn, cut stalks, and take care to dry them well, for they are excellent fodder. Get your cider presses in order. Cucumbers for pickling should be finished gathering. Gather early apples. Cut down the haum of asparagus, clean the beds, and dung them where you think necessary. Sow wheat and rye. Put your hogs up to fatten. Look to your bees and destroy drones. Plough and prepare land for sowing peas, turnips, &c. early in February, or as soon as the season will permit in the spring. Dig potatoes in dry weather and house them. Begin to secure roots, &c. from approaching hard frosts, by covering them well over with straw and dung. Get your barns in order to put up your cattle before cold weather comes on. Take care of your fax that is rotting, that it is not overtaken by severe frosts and kept on the ground all winter.

OCTOBER begins on *Tuesday*, hath xxxi Days.

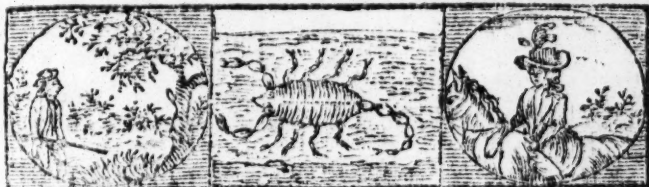

NO time in this month must be lost. Gather in your Indian corn. Prune and plant forest trees; clean out water courses. Continue gathering in potatoes. Now you may make cider in earnest. Be sure to have your Indian corn husked as soon as possible after it is gathered in heaps: If any of it is not sufficiently ripened, spread it to dry. If you neglected your asparagus beds last month, be sure to secure them this. Stop the growth of all kinds of weeds in your garden. You may now dung vacant land in your gardens, and dig and throw it in ridges. Thrash out seeds that are well dried and put them into bags. You may prune and transplant fruit trees.

NOVEMBER begins on *Friday*, hath xxx Days.

PUT up your cattle in the barn. Bleed your horses. Move your bees under shelter if neglected last month. Continue to plant fruit and timber trees. It is time you had finished husking your Indian corn. Roots of beets, parsley, carrots, potatoes, parsnips, turnips, &c. take up in a dry day, early in this month, to preserve for the use of winter; cut off the tops close, clean them from dirt, and deposit them in dry sand with the crowns of the roots downwards, over which you may throw some dry covering. Gather winter turnips early in the month if neglected before. Dig holes four feet deep and set therein cabbages with the roots to the earth, covering the hole over with boards and straw, which done, heap it well with earth; take them out in the spring and they will be excellent. Secure your cellars from frost.

DECEMBER begins on Sunday, hath xxxi Days.

A very little can be done this month, either in fields or gardens, visit your barns often. Thrash out your grain if neglected last month. Break and dress your flax. Repair, grind, and put your tools in order while you have leisure. Kill your hogs and fat cattle. Take care of young foals; Look after your bees, and feed them if they need it. Feed your pigeons; spread ashes among their dung, &c. Prepare a few useful books to instruct and amuse you, during lone evenings; If thou hast been frugal and industrious through the year, it will afford you pleasing reflections; and the fruit of your labor will enable you to enjoy more happiness than otherwise in your social hours on winter evenings. — *Farwell.*

N. B. To find the Interest for one month, take one twelfth part of the Interest for a year—for two months, take one sixth—for three months, take one fourth—for four months, take one third—for five months one fourth and one sixth—for six months one half—for seven months one third and one fourth—for eight months two thirds—for nine months three quarters—for ten months one half and one third.

REGULARITY.

NEVER delay to another time, what you can do immediately. Whatever you do, let it be done orderly, and without confusion, and take care, that the same regularity be observed in your clothes, books and smallest papers, that is in your most considerable affairs.

Regulate your expenses by your income, and so far as it will allow you, do not deny yourself things honest and necessary; but beware of taking pleasure in superfluities, lest that insensibly reduce you to an inability of furnishing yourself with things needful.

Some of the EVILS that attend GAMING.

AMONG many other evils that attend gaming are these, 1. Loss of time. 2. Loss of reputation. 3. Loss of health. 4. Loss of fortune. 5. Loss of temper. 6. Ruin of families. 7. Defrauding of creditors. And, what is often the effect of it, 8. Loss of life itself.

Of the MISERY of MEN.

THE ambition and avarice of men are the only sources of their misery. Men covet all, and make themselves wretched by their desires of superfluities. If they would live in a plain and simple manner, and be contented by satisfying their real wants, we should every where see plenty, joy and concord.

11d TABLE. Of INTEREST at 6 per cent.

N. B. The use of this Table, as by Example will appear, viz. against 50l. you will find the Interest for a Week to be 9d. for a Month, 3s. for three Months, 9s. for six Months, 18s. for a year, 1l. 16s.

		Week.			Month.			3 Months.			6 Months.			A Year.

EDUCATION.

A HUMAN soul without education, is like marble in the quarry, which shews none of its inherent beauties, till the skill of the polisher fetches out the colors, and discovers the ornamental clouds that run through the body of it. Education draws out to view every latent virtue, which without such helps would never be able to make their appearance.

We rise above one another in the esteem of the world by different degrees of perfection, proportioned to the want or advantage of a liberal education.

The care of education is a work of the highest moment, as all the advantages or miscarriages of a man's life, are in a great measure dependent on it. It is the duty therefore of parents, to infuse into the untainted youth early notices of justice and honor, that so the possible advantages of good parts may not take an evil turn, or be perverted to base and unworthy purposes.

III^d TABLE. In which the different CURRENCIES, throughout the United States, from one Farthing to a thousand Pounds, are reduced to an equivalent Value in Dollars, Cents and Mills.

Note, 10 Mills make one Cent, 100 Cents one Dollar.

The PARTIAL JUDGE.

A FARMER came to a neighboring Lawyer, expressing great concern for an accident which he said had just happened. One of your Oxen, continued he, has been gored by an unlucky Bull of mine, and I should be glad to know how I am to make you reparation. Thou art a very honest fellow, replied the Lawyer, and wilt not think it unreasonable that I expect one of thy Oxen in return. It is no more than justice, quoth the Farmer, to be sure; But what can I say?—I mistake—It is your Bull that has killed one of my Oxen. Indeed! says the Lawyer, that alters the case: I must inquire into the affair; and if—And if! said the Farmer—the business, I find, would have been concluded without an if, had you been as ready to do justice to others as to exact it from them.

IVth TABLE Shewing the Par value of the present and deferred six per cent. Stock of the United States, at the beginning of every Quarter, till the time of its final extinction, according to an Act of Congress, passed the twenty eighth of April, 1796.

Capital—one million of Dollars.

RULES for prerving HEALTH in EATING and DRINKING.

ALL aged and decrepit persons ought to eat often, and but a little at a time; because weak and wasted bodies are to be restored little by little; and by moist and liquid food rather than by solid; because moist and liquid diet doth nourish soonest, and digest easiest.

Keep constantly to a plain diet: Those enjoy most health and live longest, that avoid curiosity and variety of meats and drinks, which only serve to entice to gluttony.

The less food the sick person eats, the sooner he will recover; for it is a true saying, *The more you fill your bodies, the more you hurt them.*

All men find by experience, that in a morning before they have eaten, they are light and pleasantly easy in their bodies; but after they have indulged their appetites with plenty of food, they find themselves heavy and dull, and often sleepy: Which sufficiently shows, that those full meals are prejudicial to the welfare of the body.

The most unhealthy are found among those who feed high upon the most delicious dainties, and drink nothing but the strongest and most spirituous liquors; whereas others, who want this delicate fare, are seldom sick, unless they have such unfatiable appetites as to eat too much.

To sup sparingly is most healthful, because of the experience of an infinite number of persons, who have received the greatest benefit from light suppers. The stomach being not overburdened, the sleep is more pleasant. From sparing suppers, the breeding of those humors is prevented, which causes defluction, rheumatism, gouts, dropies, giddiness, and corruptions in the mouth from the scurvy. Many indispositions are cured by fasting, or a very spare diet.

Two meals a day is said to be sufficient for all persons after fifty years of age, and all weak people; (but it will be better to eat a little at a time and oftener) the omitting of supper contributes much to the benefit of the weak and aged. *Misers, who eat and drink but little, always live long.*

ABSTRACT of an Act of Congress, passed on the 6th day of July, 1797, laying Duties on Stamped Vellum, Parchment and Paper.

FOR every skin or piece of Vellum or Parchment, or sheet or piece of Paper, upon which shall be written or printed any or either of the instruments or writings following—to wit :

Any Certificate of Naturalization, *five dollars.*

Any License to practise, or Certificate of the admission, enrolment or registry of any Counsellor, Solicitor, Attorney, Advocate or Proctor, in any Court of the United States, *ten dollars.*

Provided, that a Certificate in any one of the Courts of the United States for one of the said Offices, shall, so far as relates to the payment of the duty aforesaid, be a sufficient admission in all the Courts of the United States, for each and every of the said offices.

Any Grant or Letters Patent, under the seal or authority of the United States (except for lands granted for military services) *four dollars.*

Any Exemplification or certified Copy of any such Grant or Letters Patent, (except for lands granted for military services,) *two dollars.*

Any Charter Party, Bottomry, or Respondentia Bond, *one dollar.*

Any Receipt or discharge for or on account of any Legacy left by any Will or other testamentary instrument, or for any share or part of a personal estate divided by force of any statute of distributions, other than to the Wife, Children or Grand Children of the person deceased, the amount whereof shall be above the value of Fifty Dollars, and shall not exceed the value of One Hundred Dollars, *twenty five cents.*

When the amount thereof shall exceed the value of one hundred dollars, and shall not exceed five hundred dollars, *fifty cents.*

And for every further sum of five hundred dollars, the additional sum of *one dollar.*

Any Policy of Insurance or instrument in nature thereof, on any ship, vessel or goods insured from one district to another in the United States, *twenty five cents.*

From the United States to any foreign port or place, when the sum for which Insurance is made shall not exceed five hundred dollars, *twenty five cents.*

When the sum insured shall exceed five hundred dollars, *one dollar.*

Any Exemplification, of what nature soever, that shall pass the seal of any Court, other than such as it may be the duty of the Clerk of such Court to furnish for the use of the United States or some particular State, *fifty cents.*

Any Bond, Bill single or penal, foreign or inland Bill of Exchange, Promissory Note or other Note, other than any recognisance bill, bond, or other obligation or contract, made to or with the United States or any State, or for their use respectively,

If above twenty dollars and not exceeding one hundred dollars, *ten cents.*

If above one hundred dollars and not exceeding five hundred dollars, *twenty five cents.*

If above five hundred dollars and not exceeding one thousand dollars, *fifty cents.*

And if above one thousand dollars, *seventy five cents.*

Provided, that if any bonds or notes shall be payable at or within sixty days, such bonds or notes shall be subject to only two fifth parts of the duty aforesaid—viz.

If above twenty dollars and not exceeding one hundred dollars, *four cents.*

If above one hundred dollars and not exceeding five hundred dollars, *ten cents.*

If above five hundred dollars and not exceeding one thousand dollars, *twenty cents*.

If above one thousand dollars, *thirty cents*.

Any Notes issued by the Banks now established, or that may hereafter be established within the United States, other than the notes of such of the said Banks as shall agree to an annual composition, of one per centum on the annual dividends made by such Banks, to their stockholders respectively, according to the following scale,

On all notes not exceeding fifty dollars, for each dollar, *six mills*.

On all notes above fifty dollars, and not exceeding one hundred dollars, *fifty cents*.

On all notes above one hundred dollars and not exceeding five hundred dollars, *one dollar*.

On all notes above five hundred dollars, *one dollar*.

Any Protest or other Notarial act, *twenty five cents*.

Any Letter of Attorney, except for an invalid pension, or to obtain or sell Warrants for Land granted by the United States as bounty for military services performed in the late war, *twenty five cents*.

Any note or bill of lading for goods or merchandise to be exported,

If from one district to another district of the United States not being in the same State, *ten cents*.

If from the United States to any foreign port or place, *twenty five cents*.

Any Inventory or Catalogue of any furniture, goods or effects, made in any case required by law, (except in cases of goods and chattels distrained for rent, or taxes, and goods taken in virtue of any legal process by any officer,) *fifty cents*.

Any Certificate of a share in any Insurance Company, of a share in the Bank of the United States, or of any State or other Bank,

If above twenty dollars and not exceeding one hundred dollars, *ten cents*.

If above one hundred dollars, *twenty five cents*.

If under twenty dollars, at the rate of *ten cents* for one hundred dollars.

INDUSTRY and SLOTH.

HOW many live in the world as useless as if they had never been born! They pass through life like a bird through the air, and leave no track behind them; waste the prime of their days in deliberating what they shall do; and bring them to a period, without coming to any determination.

An iddolent young man being asked why he lay in bed so long, jocosely and carelessly answered—Every morning of my life I am hearing causes. I have two fine girls, their names are *Industry* and *Sloth*, close at my bedside, as soon as ever I awake, pressing their different suits. One entreats me to get up, the other persuades me to lie still: And then they alternately give me various reasons, why I should rise, and why I should not. This detain's me so long, as it is the duty of an impartial judge to hear all that can be said on either side, that before the pleadings are over, it is time to go to breakfast.

RULES for FRUGALITY.

EARN a Shilling before you spend a Penny, and rather drink Water than go in score with the Tavern Keeper. Cast not away your old Clothes before you get new, and clap a Patch on the Elbow rather than go on Tick with the Tailor. Wear nothing before it is your own, and keep your Hands from Sealing Wax; (Sealing.) This is an infallible Antidote against the Contagion of Sheriffs, Bailiffs, Catchpoles and Constables.

ABSTRACT of the Act of Congress, laying a Direct Tax on SLAVES, HOUSES and LAND.

THE tax is 2000000 of Dollars.—Newhampshire is to pay 77705 dollars, 36 cents and 2 mills, as its part thereof.—*Massachusetts*, 260435 dollars, 31 cents and 2 mills.—*Rhodeisland*, 37502 dollars, and eight cents.—*Connecticut*, 129767 dollars, and 2 mills.—And *Vermont*, is to pay 46864 dollars, 18 cents and 7 mills.

The following is a statement of the tax on houses ; and it will be remembered that the Valuation is to include in the building lot, on which the houses stand, two acres of land and out houses. If these are valued at

100 dollars, the tax is 20Cents.	3000 dollars, the tax is 12 dols.
200 - - - 40	4000 - - - 20
300 - - - 60	5000 - - - 25
400 - - - dols. 80	6000 - - - 30
500 - - - 1 20	7000 - - - 42
600 - - - 1 80	8000 - - - 48
700 - - - 2 10	9000 - - - 54
800 - - - 2 40	10000 - - - 60
900 - - - 2 70	15000 - - - 105
1000 - - - 3	25000 - - - 225
2000 - - - 8	50000 - - - 500

[It appears, for the consolation of the poorer Citizens, that the rich and costly house of 50,000 dollars, is to pay five times as much in proportion to its value as the cottage that is worth only 100 dollars.]

The tax on slaves is 50 cents for all above 12 years of age and under 50.

After the tax on houses, and house lots, not exceeding two acres of land, and slaves, is assessed throughout the United States, what sum may then fall short of 2000000 of dollars, (the sum to be raised) is to be assessed upon the Lands in the United States, according to the valuations to be made for that purpose, and at such rate per centum as will be sufficient to produce the deficiency.

The WHISTLE. A TRUE STORY.

Written by Dr. FRANKLIN to his Nephew.

WHEN I was a child, at seven years old, my friends, on a holiday, filled my little pocket with coppers. I went directly to a shop, where they sold toys for children ; and being charmed with the sound of a *whistle*, that I met by the way in the hands of another boy, I voluntarily offered him all my money for one. I then came home, and went whistling all over the house, much pleased with my *whistle*, but disturbing all the family. My brothers, and sisters, and cousins, understanding the bargain I had made, told me, I had given four times as much for it as it was worth. This put me in mind what good things I might have bought with the rest of my money—and they laughed at me so much for my folly, that I cried with vexation : And the reflection gave me more chagrin, than the *whistle* gave me pleasure.

This, however, was afterwards of use to me, the impression continuing on my mind ; so that often, when I was tempted to buy some unnecessary thing, I said to myself, *don't give too much for the whistle* ; and so I saved my money.

As I grew up, came into the world, and observed the actions of men, I thought, I met with many, very many, who gave too much for the *whistle*.

When I saw any one too ambitious of court favors—sacrificing his time in attendance at levees. his repose, his liberty,

If above five hundred dollars and not exceeding one thousand dollars, *twenty cents*.

If above one thousand dollars, *thirty cents*.

Any Notes issued by the Banks now established, or that may hereafter be established within the United States, other than the notes of such of the said Banks as shall agree to an annual composition, of one per centum on the annual dividends made by such Banks, to their stockholders respectively, according to the following scale,

On all notes not exceeding fifty dollars, for each dollar, *six mills*.

On all notes above fifty dollars, and not exceeding one hundred dollars, *fifty cents*.

On all notes above one hundred dollars and not exceeding five hundred dollars, *one dollar*.

On all notes above five hundred dollars, *one dollar*.

Any Protest or other Notarial act, *twenty five cents*.

Any Letter of Attorney, except for an invalid pension, or to obtain or sell Warrants for Land granted by the United States as bounty for military services performed in the late war, *twenty five cents*.

Any note or bill of lading for goods or merchandise to be exported, If from one district to another district of the United States not being in the same State, *ten cents*.

If from the United States to any foreign port or place, *twenty five cents*.

Any Inventory or Catalogue of any furniture, goods or effects, made in any case required by law, (except in cases of goods and chattels distrained for rent, or taxes, and goods taken in virtue of any legal process by any officer,) *fifty cents*.

Any Certificate of a share in any Insurance Company, of a share in the Bank of the United States, or of any State or other Bank,

If above twenty dollars and not exceeding one hundred dollars, *ten cents*.

If above one hundred dollars, *twenty five cents*.

If under twenty dollars, at the rate of *ten cents* for one hundred dollars.

INDUSTRY and SLOTH.

[It appears, for the consolation of the poorer Citizens, that the rich and costly house of 50,000 dollars, is to pay five times as much in proportion to its value as the cottage that is worth only 100 dollars.]

The tax on slaves is 50 cents for all above 12 years of age and under 50.

After the tax on houses, and house lots, not exceeding two acres of land, and slaves, is assessed throughout the United States, what sum may then fall short of 2000000 of dollars, (the sum to be raised) is to be assessed upon the Lands in the United States, according to the valuations to be made for that purpose, and at such rate per centum as will be sufficient to produce the deficiency.

THE WHISTLE. A TRUE STORY.

Written by Dr. FRANKLIN to his Nephew.

WHEN I was a child, at seven years old, my friends, on a holiday, filled my little pocket with coppers. I went directly to a shop, where they sold toys for children; and being charmed with the sound of a *whistle*, that I met by the way in the hands of another boy, I voluntarily offered him all my money for one. I then came home, and went whistling all over the house, much pleased with my *whistle*, but disturbing all the family. My brothers, and sisters, and cousins, understanding the bargain I had made, told me, I had given four times as much for it as it was worth. This put me in mind what good things I might have bought with the rest of my money—and they laughed at me so much for my folly, that I cried with vexation: And the reflection gave me more chagrin, than the *whistle* gave me pleasure.

This, however, was afterwards of use to me, the impression continuing on my mind; so that often, when I was tempted to buy some unnecessary thing, I said to myself, *don't give too much for the whistle*; and so I saved my money.

As I grew up, came into the world, and observed the actions of men, I thought, I met with many, very many, who gave too much for the *whistle*.

When I saw any one too ambitious of court favors—sacrificing his time in attendance at levees, his repose, his liberty,

ture, and perhaps his friends, to attain it—I have said to myself, *This man gives too much for his whistle.*

When I saw another fond of popularity, constantly employing himself in political bittles, neglecting his own affairs, and running them by that neglect, *He pays, indeed, says I, too much for his whistle.*

If I knew a miser who gave up every kind of comfortable living—all the pleasure of doing good to others—all the esteem of his fellow citizens—and the joys of benevolent friendship, for the sake of accumulating wealth; *Poor man, says I, you do indeed pay too much for your whistle.*

When I meet a man of pleasure, sacrificing every laudable improvement of the mind or of his fortune, to mere corporeal sensations—*Mistaken man, says I, you are providing pain for yourself instead of pleasure—You give too much for your whistle.*

If I see one fond of fine clothes, fine furniture, fine equipages, all above his fortune, for which he contracts debts, and ends his career in prison—*Alas, says I, he has paid dear, very dear, for his whistle.*

When I see a beautiful, sweet tempered girl, married to an ill-natured brute of a husband—*What a pity it is, says I, that she has paid so much for a whistle.*

In short, I conceived, that great part of the miseries of mankind were brought upon them by the false estimates they had made of the value of things, and by their giving too much for their whistles.

The DRUNKARD'S LOOKING GLASS.

First, Some general effects of Intemperance.

DRUNKENNESS makes a man unfit for good—drowns and insatuates the senses—depraves the reason—befogs the understanding—causes errors in judgment—defiles the conscience—hardens and steals away the heart—brings a spiritual lethargy—it is a work of darkness—an annoyance to modesty—a gate to every kind of debauchery—a discoverer of secrets—a betrayer of trust—a depriver of honesty—a forerunner of misery—it cracks men's credit—empties their purses—consumes their estates—violates the rules of temperance—perverts the order of nature—causes profane and cursed speeches, vaunting, swearing and blasphemy—quarreling, fighting and murder—it is the mother of mischief, vice and pride—the nurse of riot and fury—the school of lying and slander—a discoverer of folly—an oppressor of nature—an impairer of health—it deforms the visage—corrupts the breath—stupifies the spirits—intoxicates the brain—decays the memory—inflames the blood—begets unnatural thirst—causeth stammering of speech—reeling and staggering—Ghly and loathsome vomiting—dropies, surfeits, &c.—it is a voluntary madness—a deceiver of fools—a bewitching poison—an invited enemy—a flattering devil—it causes forgetfulness of God—is a provoker of his judgments—hastens, and often brings untimely death—and at last destroys the soul.

Secondly, Some particular characters of a Drunkard.

A Drunkard in that state is indisposed to virtue—is a licentious person—makes his belly his god—is worse than a brute—a companion of riot and revelling—a game and sport to profane people—a ridiculous object—his own sorrow, woe and shame—his wife's grief—his children's disgrace—his neighbors' contempt and derision—his family's ruin—a thief to himself—a scandal to christianity—a dishonor to God,

and an abuser of his mercies—a loser of his time—a destroyer of his reputation, parts and credit—is subject to many dangers—a slave to the devil and his own lusts—a traveller to destruction—a transgressor of the laws of God and man, (against whom dreadful woes are pronounced)—he is his own soul's enemy—a human monster—and at last may be excluded God's kingdom.

And you, tavernkeepers, retailers and others that are concerned in giving, selling to, or causing any to drink to excess, either wine or other strong drink, are also guilty, and against whom a woe is pronounced: *Woe unto him that giveth his neighbor strong drink, that putteth thy bottle to him and makest him drunken.*

It may not be amiss to add to the foregoing, an extract, taken from the Moral and Physical Thermometer of Dr. Benjamin Rush of Philadelphia; of the vices, diseases and punishments, which naturally result from intemperance; which may serve as a magnifying glass to those who will not be reclaimed by the looking glass.*

The *Vices* it produces are—Idleness—peevishness—quarrelling—fighting—lying—swearing—fraud—anarchy—hatred of just government—murder—suicide.

The *Diseases* are—Gout—sickness—puking—tremors of the hands in the morning—bloatdness—inflamed eyes—red nose and face—sore and swelled legs—jaundice—pains in the limbs, and burning in the hands and feet—dropsy—epilepsy—melancholy—idiotism—madness—palsy—apoplexy—death.

The *Punishments* are—Debt—black eyes—rags—hunger—almshouse—workhouse—jail—whippingpost—stocks—Cattleisland—Newgate—gal-lows. And unless repentance should prevent, they will share in the punishment prepared for the devil and his angels.

To whom it may concern.

* See our Almanack for the year 1792.

THE GOOD NEIGHBOR.

THE duties and the comforts of good neighborhood consist in the suppression of the selfish, the irascible, and the malevolent passions, and in the cultivation and exercise of those that are generous and friendly. He that is attentive only to his own concerns and interest, and cares not what becomes of others; he that is easily provoked and ready to resent; he that is envious at the prosperity of others, or wishes their hurt, or is glad of their calamity, cannot be a good neighbor. He only is deserving of the character, who is kind, obliging, who is as willing to do a good turn, as to receive one; willing to lend as well as to borrow; who is tender of the characters and of the interests of those among whom he lives; who, being a fallible creature himself, is disposed to make all reasonable allowances for the failings of others; in short, who is observant of the golden rule, *to do to others whatsoever he would have others to do to him.*

The Sun's Passage compared to the Stages of Life.

WHEN lately considering the sun's passage along the Zodiac, it occurred to me that the names of the signs bear some affinity to the state of man while in his progress of life, allowing seven years to his life during each sign.

From 1 to 7—While in Capricorn, the child, like the weather in January, is weak and tender, like the sprouting of the goat's

horns, and shews little signs of real life, except what arises from pain, or little transient joys ; and

From 7 to 14—In February, or Aquarius, every trifling cause draws plenty of tears, like the inconstant weather of that month.

From 14 to 21—In Pisces, or March, when the youth has acquired strength of body, and the faculties of the mind act more powerfully, like the fish he is active and restless.

From 21 to 28—During Aries and Taurus, as the faculties of the mind are become strong, plans are generally formed and pursued in youth with the vigor and strength of the ram and the bull.

From 28 to 35—The man enjoys with steadiness his plan of life, and generally enjoys the fruits of it in plenty, as twins are esteemed to be.

From 35 to 42—Though yet in the full enjoyment of his strength of body, and of the faculties of his mind ; yet Cancer like, he finds that he is rather on the decline, or going back.

Yet he still continues, like the Lion, with courage and perseverance to pursue his steady course,

From 42 to 56—to that in Virgo, he acquires the character of the calm discretion of the virgin.

From 56 to 63—The grand climacteric being now passed, the infirmities of age come on, the pains of chronic diseases, like the stings of the Scorpion, torment the infirm man.

After 70, the keepers of the house shall tremble, and the strong men shall bow themselves, and the grinders shall cease because they are few, and those that look out of the windows be darkened. We then shall see the archer, Sagittarius, level his dart, and the body return to the dust, of which it was ; and may the spirit return to God, who gave it.

THE HAPPY PAIR.

***** IT was a neat little house, by the side of the fields, a pretty looking woman, dress'd by Simplicity, Nature's handmaid, was laying the table cloth, and trimming up her little parlor ; her looks were cheerful and serene, and with a pleasing voice, though wild and untutored, she sung the following stanzas :

Here, beneath my humble cot,
Tranquil peace and pleasure dwell ;
If contented with our lot,
Santling joy can grace a cell.

Nature's wants are all suppli'd ;
Food and raiment, house and fire ;
Let others swell their courts of pride,
This is all that I require.

Just as she had finished, a genteel young man entered the gate ; she ran eagerly to meet him.

" My dear Charles, she cried, you are late to night."

" I am weary, Anna," said he, leaning his head upon her shoulder.

" I am sorry for it, my love ; but come, eat your supper, and you shall then repose on my bosom, and hush all your cares to rest.

" If to be content is to be happy, my dear, said she, how superlatively happy am I. I have no wish beyond what our little income will afford me ; my home is to me a palace, thy love my estate. I envy not the rich dames who shine in costly array ; I please my Charles in my plain simple attire ; I wish to please no other."

" Thou dear reward of all my toils ! cried Charles, embracing her, how can I have a wish ungratified, while possessed of thee. I never desired wealth but for thy sake, and thy cheerful, contented disposition, makes even wealth unnecessary."

It is by no means necessary to happiness, said I, as I left the house. Charles and Anna seem perfectly happy and content, with only a bare

competence. I ask but a competence, cries the luxurious or avaricious wretch; this very exclamation convinces us, that a trifle is adequate to the wants of the humble, frugal mind, while thousands cannot supply the inordinate desires of the prodigal, or satisfy the grasping disposition of the miser.

A S C R A P.

HE who gives to the Public, and he who is benevolent, are certain to be repaid with the illiberal observations of the uncharitable, and the malicious sneers of the envious; but the truly good will applaud, and the receiver will be grateful.

To T A V E R N K E E P E R S.

IT is to the interest of Tavernkeepers to furnish the Editor of this Almanack, yearly, with correct Lists of the stages or distances from one public house to another, on the great travelling roads. If they will send such Lists in season, they will be attended to.

A sovereign Remedy for CANCERS.

By WILLIAM LEIGH, of MARYLAND.

BURN half a bushel, or three pecks, of (green) old field red oak bark to ashes. Boil the ashes in three gallons of water, until reduced to one, strain that one gallon off, and boil it away to a thick substance, (similar to buttermilk or cream) apply a small quantity on a piece of silk or lint, to the cancer, no bigger than the place or part affected.—I have known two plaisters to effect a cure, where the cancer lay in a proper position for the medicine immediately to penetrate down to the roots of it, otherwise it may take several plaisters; as the medicine must be repeated every two hours until the cancer's roots are sufficiently killed, then apply healing salve (with a little mercurial ointment mixed therein) and dress it twice a day, until cured, which it will surely be in about twenty or thirty days (at farthest.) I have known several persons entirely relieved of cancers (and none have failed) by the above prescription.—One in particular, was cured after being twice cut by a skilful doctor.

P. S. After being greatly alarmed myself with a cancer about three years ago, having followed a most impartial, and well experienced skilful doctor's directions for some time, contrary to his opinion, and my family's fears, (on that account,) I, notwithstanding, most happily experienced two plaisters of the above medicine, with infallible success, in so much that no symptom of it has ever appeared since.

Another CURE for a CANCER.

TAKE a slice of fresh Veal, about the thickness of the blade of a case knife, out of the thigh; cut it across the grain, with a sharp instrument, so that it may be entirely smooth; spread it over the whole sore—repeat the same as often as it begins to smell disagreeably, and it will perfect a cure in a short time. The gentleman who gives this information, had one on his face for five years, and by the application of this remedy, two days and an half, it is now entirely cured.

[Although we cannot put much confidence in the above remedy, yet as it is asserted by many to be beneficial, and as it is so simple and so easily applied, trial should be made. It can do no harm if it should not do good.]

CURE for the STONE.

A GENTLEMAN, who had very long labored under this disagreeable disease without receiving any benefit from medical aid, was in possession of a negro slave, who often offered to cure him, but whose offers were refused as chimerical.—At length, finding he should die if help could not be obtained, he offered the negro his freedom on condition he would cure him, and divulge the receipt. The cure was soon effected, and the negro gave his recipe, viz. The expressed juice (or strong decoction) of dry Horse Mint, and of Red Onions, one gill of each to be taken every morning and every evening till the complaint be removed.

CURE for SORE HEELS.

THE coldness of the feet appears a probable cause whereby circulation is obstructed, the outside grain of the skin benumbed and easily rubbed off, and soreness takes place, which, perhaps, is more easily prevented before it takes place than afterwards. A likely means to prevent it, would be to wash the feet, at least once a week, in salt water; and upon the first intimation of danger, to take a small tea spoon full of spirits and rub into the heels and feet, every morning, which would cause an agreeable glow, and promote circulation and perspiration, the want of which is the probable cause of sore heels.

The New FRENCH CALENDAR for the present Year, which began
September 22, 1798.

Names of Months, French.	English.	Term. (Inclusive.)
A U T U M N.		
Vindemaire,	Vintage Month, from	Sept. 22 to Oct. 21.
Brumaire,	Fog Month, ———	Oct. 22 to Nov. 20.
Frumaire,	Sleet Month, ———	Nov. 21 to Dec. 20.
W I N T E R.		
Nivose,	Snow Month, ———	Dec. 21 to Jan. 19.
Pluviose,	Rain Month, ———	Jan. 20 to Feb. 18.
Ventole,	Wind Month, ———	Feb. 19 to March 20.
S P R I N G.		
Germinal,	Sprouts Month, ———	Mar. 21 to April 19.
Florealy,	Flowers Month, ———	April 20 to May 19.
Praireal,	Pasture Month, ———	May 20 to June 18.
S U M M E R.		
Messidor,	Harvest Month, ———	June 19 to July 18.
Fervidor,	Hot Month, ———	July 19 to Aug. 17.
Fructidor,	Fruit Month, ———	Aug. 18 to Sept. 16.

Sans Culattides, or Feasts dedicated to

Les Vertus,	The Virtues,	Sept. 17.
Le Genie,	Genius,	Sept. 18.
Le Travail,	Labor,	Sept. 19.
L'Opinion,	Opinion,	Sept. 20.
Les Recompenses,	Rewards,	Sept. 21.

The intercalary day of every fourth year is to be called **LA SANS CULOTTIDE**; on which there is to be a National Renovation of their oath, "To live free or die." The month is divided into three decades, the days of which are called, from the Latin Numerals,

1. <i>Primidi.</i>	2. <i>Duodi.</i>	3. <i>Tridi.</i>	4. <i>Quartidi.</i>
5. <i>Quintidi.</i>	6. <i>Sextidi.</i>	7. <i>Septidi.</i>	8. <i>Octodi.</i>
9. <i>Nonodi.</i>	10. <i>Decadi, which is to be the day of rest.</i>		

RATE OF POSTAGE OF A SINGLE LETTER:

FOR 30 miles, 6 cents. For 60 miles, 8 cents. For 100 miles, 10 cents. For 150 miles, 12½ cents. For 200 miles, 15 cents. For 250 miles, 17 cents. For 350 miles, 20 cents. For 450 miles, 22 cents. For more than 450 miles, 25 cents. Every double letter is to pay double the said rates; every triple letter, triple; every packet weighing one ounce, at the rate of four single letters for each ounce. Every enclosure the same as a letter.

FRIENDS' YEARLY AND QUARTERLY MEETINGS.

THE yearly Meeting for New England, is holden at Newport, in Rhode Island, on the 5th day before the 2d 6th day in the 6th month; consisting of four Quarterly Meetings, by the names of Rhode Island, Sandwich, Salem and Falmouth. Salem Quarterly Meeting is holden on the 5th day before the 2d 6th day in the 9th month at Berwick, the 5th day before the 2d 6th day in the 12th month at Dover, the 5th day before the 2d 6th day in the 3d month at Seabrook, and the 5th day before the 1st 6th day in the 6th month at Salem. Falmouth Quarter is holden on the 5th day before the 1st 6th day in the 9th month at Vassalborough, 12th month at Durham; 3d month at Windham, and 5th day before the 1st 6th day in the 5th month at Falmouth.

MAXIM.

EVERY body takes pleasure in returning small obligations; many go so far as to acknowledge moderate ones; but there is hardly any one who does not repay great obligations with ingratitude.

AGRICULTURAL.

AUGUST and September are the proper months to inoculate or bud most kinds of fruit trees—an operation that every landholder should have some knowledge of.

When a tree has finished its growth for the year, a bud is formed at the very tip or the end of the twig—which denotes that it is in the proper state to bud or inoculate. Some trees are indeed an exception, as they continue growing almost the whole season and may be budded through all July and August.

With a sharp knife slit the bark of any twig, not more than half an inch thick, and not less than a quarter of an inch: Carefully cut through the bark (but not wound the wood under it.) Let the slit be rather more than an inch long. In like manner, cut half an inch long across this slit at the bottom, so that the two cuts through the bark will resemble a **T** bottom upwards. Then take a bud of the fruit you wish to propagate, with its bark near an inch long, taking care to loosen it from the woody part of the stem, so as to put it off with your thumb and finger, separating the bark and the eye under the bud from the wood. If the eye is left on the wood, you must throw by the bud and take another. Then insert the bud under the **T**, before described, and bind it down with woollen strings, or well soaked strips of bark of bass wood, leaving the eye of the bud to the air. In two or three weeks the bud will unite with the stock, when the string must be loosened. The stock may be cut away the next spring.

This method is, on many accounts, better than grafting. It gives the farmer another chance, provided his grafts fail in the spring.—Stone fruits succeed only, or best with inoculation. Small twigs, too small for common grafting, answer well—and above all in this way, very little injury is done to the stock.

In a fruit country, this method ought to be well understood.

A Correspondent says, that crowding, with the addition of a very little salt, is a good plaster for the wounds of fruit trees. When large limbs are cut off, the stumps should be covered to keep out the air.—Too much salt will spoil the tree.

LIST of LODGES under the JURISDICTION of the GRAND LODGE of FREE and ACCEPTED MASONS, in the COMMONWEALTH of MASSACHUSETTS.

St. John's Lodge, at Boston. Rising States, at do. Philanthropic, at Marblehead. Portland, at Portland. Tyrian, at Gloucester. Massachusetts, at Boston. St. Peter's, at Newburyport. Trinity, at Lancaster. Warren, at Machias. Unity, at Sandwich. King Solomon's, at Charlestown. Friendship, at Williamstown. Essex, at Salem. Lincoln, at Wiscasset. Old Colony, at Hanover. Federal, at Blanford. Morning Star, at Worcester. Hancock, at Penobscot. Franklin, at Cheshire. Republican, at Greenfield. Middlesex, at Framingham. Evening Star, at Lenox. Concinnatus, at Newmarketborough. Fayette, at Charlton. Washington, at Roxbury. King Hiram, at Truro. Kennebeck, at Hallowell. Harmony, at Northfield. Union, at Dorchester. Thomas, at Monson. Montgomery, at Franklin. Bristol, at Norton. Jerusalem, at South Hadley. Fellowship, at Bridgewater. Corinthian, at Concord. St. Paul's, at Groton. Adams, at Welfleet. Olive Branch, at Oxford. Meridian Sun, at Brookfield. Hiram, at Lexington. Meridian, at Watertown. King Solomon's Lodge of Perfection, at Holmes' Hole. Marine Lodge, at Falmouth. Mount Moriah, at Reading. Eastern Star, at Rehoboth. Social Lodge, at Athby.

A Chapter of **ROYAL ARCH**, is holden at Boston, another at Newburyport, and another at Martha's Vineyard.

EXPLANATION of the PARADOXICAL WEDDING.

MR. THOMAS,

THERE were three brothers; two of them married the daughter of the other. The youngest brother married his eldest brother's grand daughter. These six persons, make all the relations mentioned in the Paradoxical Wedding inserted in your last year's Almanack. Your friend,

CALISTA.

The following is a LIST of STAGES that run from BOSTON, and also of the PLACES from which they start.

ALBANY Mail Stage goes through Worcester, Brookfield and Northampton to Albany; sets off from white horse tavern, Newbury street, Boston, every Mon. and Thurs. morning at 6 o'clock, and arrives at Albany every Thurs. and Mon. noon.

PROVIDENCE and Newyork Southern Mail Stage sets off from Israel Hatch's stage office, at the new Coffee House, corner of Exchange lane, opposite Union bank, State street, every Tues. Thurs. and Sat. at 9 o'clock in the morning, and runs through to Newyork; arrives there every Wed. Frid. and Sun. noon; leaves Newyork every Tues. Thurs. and Sat. 10 o'clock morning, and arrives in Boston every Fri. Mon. and Wed. 3 o'clock afternoon.

NEWYORK Mail Stage sets off from Pease's stage office, No. 71, State Street, every Mon. Wed. and Fri. 10 o'clock in the morning, and arrives at Newyork, every Thurs. Sat. and Tues. 11 o'clock; leaves Newyork every Mon. Wed. and Fri. 11 o'clock morning, and arrives at Boston every Thurs. Sat. and Tues. at 12 o'clock noon.

OLD Line Stage to Newyork sets off from Pease's stage office, every Tues. Thurs. and Sat. 10 o'clock morning, and arrives at Newyork every Fri. Mon. and Wed. 11 o'clock morning; leaves Newyork every Tues. Thurs. and Sat. 11 o'clock morning, and arrives at Boston every Fri. Mon. and Wed. 10 o'clock.

LEOMINSTER Mail Stage goes through Concord and Lancaster, to Leominster; sets off from Pease's stage office, every Wed. and Sat. at sun rise; arrives at Leominster, 3 o'clock same days; leaves Leominster every Mon. and Thurs. at sun rise, and arrives in Boston same days at 4 o'clock.

PORTSMOUTH Mail Stage goes through Salem, sets off from Major King's tavern, in the Market, every Mon. Wed. and Friday, 2 o'clock in the morning, and arrives at Portsmouth the same days, at 6 o'clock in the evening; leaves Portsmouth every Tues. day, Thurs. day and Saturday, at 3 o'clock in the morning, and arrives in Boston the same days, at 6 o'clock in the evening.

AMHERST Mail Stage runs through Billerica; starts from Major King's tavern in the market, Wed. morning, 3 o'clock, and arrives at Amherst, 7 o'clock in the evening of the same day; leaves Amherst every Mon. 3 o'clock morning, and arrives in Boston, 7 o'clock evening same day.

PROVIDENCE Stage starts from Major King's tavern every day in the week, (Sundays excepted) at 8 o'clock in the morning.

PLYMOUTH Mail Stage runs through Hingham; starts from Major King's tavern, every Tues. and Sat. at 6 o'clock morning, and arrives at Plymouth same

days at 4 o'clock afternoon; leaves Plymouth every Mon. and Fri. 6 o'clock morning, and arrives in Boston at 4 o'clock afternoon same days.

SALEM Mail Stage starts from Major King's tavern every day in the week, (Sundays excepted) at 3 o'clock afternoon, and arrives in Boston every day, at 11 o'clock in the morning.

MARBLEHEAD Stage starts from Major King's tavern the same as Salem.

DEDHAM Stage starts from Major King's tavern every day in the week, (Sundays excepted) at 4 o'clock afternoon, and arrives in Boston, every day at 10 o'clock morning.

QUINCY Stage starts from Major King's every Tues. Thurs. and Sat. at 4 o'clock afternoon, and arrives in Boston same days, at 10 o'clock in the morning.

CANTON Stage starts from Major King's every Tues. and Sat. at three o'clock afternoon, and arrives in Boston the same days at 9 o'clock morning.

SALEM Stage starts from Major Forbes's, Market, every day in the week, (Sundays excepted) at 3 o'clock afternoon, and arrives in Boston every day at 11 o'clock in the morning.

TAUNTON and **NEWBEDFORD** Mail Stage starts from Major King's every Mon. Thurs. and Sat. at 4 o'clock morning, arrives at Taunton at 12 o'clock and at Newbedford at six o'clock the same evening. Sets off from Newbedford, every Mon. Wed. and Fri. at 4 o'clock morning, and arrives in Boston, same days at 6 o'clock, evening.

DORCHESTER and **MILTON** Stage starts every day from Major Forbes's tavern at four o'clock afternoon, and arrives in Boston every day at 9 o'clock morning.

CAPEANN Stage goes through Salem and Bevely; starts from the Yankee Hero tavern, Wing's lane, every Wed. and Sat. at 8 o'clock in the morning, and arrives the same day at Capeann; leaves there every Tues. and Fri. and arrives in Boston the same days at 4 o'clock.

MEDFORD Stage starts every day, (Sundays excepted) from Mr. Silas Clark's tavern, Wing's lane, at 12 o'clock, and arrives every day in Boston at 8 o'clock in the morning.

HAVERHILL Stage goes through Andover; starts from Mr. Peabody's tavern, Ann street, every Monday and Thurs. at 6 o'clock in the morning, and arrives at Haverhill, at 1 o'clock same days; leaves there at 10 o'clock every Wed. and Sat. and arrives in Boston at 6 o'clock same days.

NEWBURYPORT Stage starts from Mr. Peabody's every Wednes. Thurs. and Sat. at 6 o'clock morning, and arrives at Newburyport, at 4 o'clock same days; leaves there every Mon. Tues. and Thurs. at 6 o'clock in morning, and arrives in Boston 4 o'clock afternoon same days.

A N E C D O T E S, &c.

IN a select company, some little time since, the topic of conversation chanced to be what university each of the company was educated at: One was at Newhaven, another at Cambridge. For my part, says a young clergyman, I was educated at both universities—Newhaven and Cambridge. That puts me in mind, says an old doctor of divinity, of a story I once heard, of a calf that sucked two cows: And what was the consequence, pray? says the young clergyman. Why the consequence was, replied the doctor of divinity, that he was a very great calf.

AS George the Third, was walking the quarter deck, with his hat on, a sailor asked his mesmate, who that fellow was, that did not dowsle his peak to the Admiral? Why, the King, says Jack—well, King or no King, retorts the other, he is an unmannerly dog. Lord! where should he learn manners? replies Jack, *he never was out of sight of land in his life.*

A GENTLEMAN said to the celebrated Bignion, Rome is the seat of Faith. It is true, replied he, but this Faith is like those people who are never at home.

A WORN out Bacchanal, observed, that he put a plate of lead in his shoes to keep him upright. Well balanced, by Jove, said a bystander, *Lead at both ends.*

AN ignorant candidate for medical honors, having thrown himself almost into a fever, from his incapability of answering questions, was asked by one of the censors, how he would sweat a patient for the Rheumatism? "*I swear I would send him here to be examined.*"

A Mr. Hastings having entered on his 60th year, invited his relatives and friends to make merry upon the occasion: As the glass circulated to his health, the majority wished that he might live 50 years longer. One of his brothers limited life to 49 years. The reason being asked of this singularity, he promptly replied, it is written, *the sinner being an two years' old, shall be accursed.*

A PHYSICIAN was asked, whether his patient's fever had gone off? I believe so, answered the Doctor, and the man is gone with it.

A COUNTRYMAN, being requested to help a member of Congress out of a ditch, replied that he had no hand in *state* affairs.

A SHOEMAKER, being told by one of his customers, that the boots did not take in the *whole* calf; protested it might be so—they want, sir, about 5 feet 10 inches by your measure.

A GENTLEMAN by the name of Virgin, unfortunately married a Cyprian disciple. Upon discovering his mistake, he proposed a separation. She remonstrated strongly. He tartly replied, "*Madam, I leave you, what I did not find you.*"

A RAGGED Musician being complimented, upon the powers of his voice, observed, he could make any thing of it. A bystander advised him, to make a suit of clothes out of it.

MRS, W——, walking on one of the wharves at New York, jocosely asked a sailor, why a ship was always called the? Oh faith, says the son of Neptune, because the rigging coils more than the hull.

A PHYSICIAN observed to a clock maker, whose work needed mending, that if he was to make such errors in practice, it would be attended with the loss of all his patients. The man drily replied—Good Doctor, the sun discovers my faults—the earth hides yours.

AN Irishman, was lately brought before a Justice, charged with marrying six wives. The Magistrate asked him, how he could be so hardened a villain? Please your worship, says paddy, I was trying to get a good one.

THE late Mr. Croswell, when young in the ministry, asked an elder Clergyman to pray that his steps might be directed. The clergyman, accordingly began, "*Lord, thy servant Croswell is a weathercock.*" Croswell, who did not feel pleased at this pulpit compliment, stared the minister full in the face—he happily recovered himself by adding, "*a weathercock, O Lord, waiting for thy wind to turn him.*"

Epigram.

WHEN fate decreed his wife should die
NED shed no tear—he breath'd no sigh
We bless, said he, the will of heaven,
That takes away what it hath given.

Product of various Branches of Literature on Man.

MORAL philosophy makes the honest man.

Natural philosophy, the ingenious man.
History, the man of experience.
Poetry, the man of wit.
Rhetoric, the eloquent man.

Polite learning sheds a diffusive grace
and ornament upon all kinds of literature.

The knowledge of the world constitutes the intelligent man.

The study of the sacred pages forms the good man.

But all these must go together to make the perfect, complete gentleman.

ROADS to the principal towns on the continent, &c. from

B O O K S.

ISAIAH THOMAS, at the WORCESTER BOOKSTORE,
HAS FOR SALE,

A VERY large Collection of BOOKS, in the various Branches of polite Literature, which he will sell, by Wholesale and Retail, on the very lowest terms for cash.

* * Those who wish to purchase, either large or small quantities, for Libraries, &c. will find it to their interest to call and examine the books and prices. As Mr. Thomas wishes to part with all his present large stock, he will absolutely sell as cheap, at least, as any bookseller in the United States.

U

1
